Work Experience

Total Quality Logistics, Cincinnati, OH

06/2023 – Present

I work as a full-stack software developer responsible for maintaining and developing our internal and external web applications. Notable projects include a financial system swap from Chase to Paypal, the redesign and development of an antiquated user management system, and even involvement in a company-wide modernization effort.

Bowling Green State University, Bowling Green, OH

08/2022 – 12/2022

I was responsible for assisting students in the programming fundamentals class with their programming assignments. I also helped host the weekly study sessions where we reviewed material and helped the students with their projects.

Education

Bachelor of Science in Computer Science, Bowling Green State University

08/2020 - 12/2023

I took a variety of challenging classes that advanced my knowledge of computer systems ranging from software development using object-oriented programming languages, computer networking, advanced algorithm design, and management of relational databases.

Application Development and Programming, Delaware Area Career Center

08/2018 - 05/2020

I learned the fundamentals of programming using JavaScript and C# and applied them to a multitude of projects ranging from website development to basic game design using the Unity Game Engine.

Technical Skills

HTML, CSS, JavaScript, TypeScript, Angular, React, C# and .NET, C++, SQL, MongoDB, Git, LaunchDarkly, AWS, Microsoft Azure, Unity 3D, MongoDB, NodeJs
